

15.20 Scope:

This guideline is intended to provide a very basic framework of action in the event a bomb is reported or other tactical violence is threatened (terrorism). Terrorism incidents may include, but are not limited to, Biological, Nuclear, Incendiary, Chemical and Etiological Incidents (Weapons of Mass Destruction or WMD). It must be noted that criminal incidents are primarily police matters, and the Fire Department is present in an advisory role and if the need for fire suppression or a Hazardous Materials response should become necessary.

15.2001 Response:

All companies responding to bomb scare & tactical violence (WMD) incidents shall respond non-emergency to minimize attention given to the incident, unless directed differently by law enforcement personnel or if known injuries are present.

All companies arriving at the given location shall stage a minimum of 500 feet (1000 feet preferred) from the reported building or area.

15.2002 Communications:

Because the possibility exists that a bomb may be detonated by remote control, radio signals, mobile and portable radios shall not be used within 500 feet of the reported building or area. Communications shall be made with the use of runners relating information from the incident commander to the companies in the staging area. Communications to the dispatch center shall be made by cell phone, mobile radio or portable radios located greater than 500 feet from the reported building or area.

15.2003 Operations:

1. Life Safety is normally the First Priority. In the case of Tactical Violence (WMD), that priority may be best accomplished by **ISOLATING & INVESTIGATING** the situation FIRST.
2. Utilize the National Incident Management System framework for reducing hazards and managing the resources. Establish a Unified command system as soon as possible.
3. Identification and utilization of all resources available to assist CTFD in tactical violence and/or terrorism incidents (WMD) shall be accomplished:
 - a. Law Enforcement - CTPD, FBI, ATF, etc.
 - b. Berks County - Mobile Command Post
 - c. Military - National Guard
 - d. Berks County Emergency Management
4. Maintain the scene as a Crime Scene, preserve evidence and document observations.
5. Maintain awareness for malicious causes at Mass Casualty Incidents as multiple patients with common symptoms may be the first sign of a possible threat.
6. Be aware of secondary devices meant to harm responders.
7. Minimize exposure to responders by the maximum use of PPE, controlled/limited entry/exit for tasks and staging of resources at a safe distance.

EMERGENCY OPERATIONS

Cumru Township Fire Department
Standard Operating Guidelines
Section 15.20

Bomb Scare/Terrorism Operations

8. Establish, at least, a basic decontamination zone at any suspected incident.

9. Perform a continual size-up and protect personnel accordingly.

Bomb Threats - First arriving engine companies shall prepare to connect to a hydrant and lay out, should the need arise.

The incident commander shall meet with all parties involved with the incident. The decision to evacuate shall be made by the company owners, authorized representatives, or by the Cumru Township Police Department; not by the Cumru Township Fire Department.

Should detonation occur with fire, concentration should be made to contain the fire and the rescue of trapped persons.

15.2004 Safety:

All members are to be in full protective clothing including SCBAs until otherwise informed by the incident commander. At no time, shall Fire Department personnel be engaged in searching for bombs, incendiary devices, or similar devices. CTFD personnel may be used to accompany qualified individuals who are searching for items that are "out of place" or unusual. If a potential or suspicious device is spotted or discovered, there should be no attempt to move that device by CTFD personnel. Should a bomb detonate, additional caution should be used. A second bomb may detonate, designed to cause injury to emergency response personnel.
