NOTICE OF DANGEROUS SITUATION—CARBON MONOXIDE ALARM

The Cumru Township Fire Department responded to _____
on ____ / ____ / _____. A carbon monoxide level of _____ppm was found.

____ Less than 10 ppm:

Our monitoring device did not detect elevated levels of Carbon Monoxide at this time. Check your CO detector per the manufacturer's recommendation. Attempt to reset the CO detector or change batteries. If the alarm activates dial 911.

____ More than 10 ppm and less than 100ppm:

We have detected potentially dangerous levels of Carbon Monoxide. We recommend that you contact a qualified, licensed service technician to positively identify and correct the problem.

____ More than 100 ppm:

We have detected potentially lethal levels of Carbon Monoxide. It is not safe to stay in your home until the problem is found and corrected by a qualified, licensed technician.

____ Appliance:

The possible source of the CO may have been due to the following appliance _____, for this reason we shut it off. This appliance needs to be checked and repaired by a qualified, service technician.

____ Pregnant Women:

If you are pregnant, the Cumru Township Fire Department strongly recommends that you seek medical attention due to the potential effects on both mother and fetus.
